Copymat's Innovative AI Technology

Copymat's CP40A offers the optimal solution for your needs

Copymat's AI image processing technology offers a range of robust features, including **blank page removal**, **automatic rotation**, **image deskewing**, and **precise cropping**. With the added benefit of **automatic orientation**, these advanced capabilities effectively address common challenges encountered in the copying process.

By leveraging Copymat's technology, users can enhance their operational efficiency and productivity significantly, ensuring seamless document management and reproduction.

Auto Copy - Automatic copy after document is inserted

The intelligent AI technology allows you to simply load your document and then the next second your copy is done. It is simply that easy without having to press any button !

Placing Your Document Casually - Automatically crop and straighten image

With advanced auto crop and straighten function, users no longer need to carefully placing document to the edge of paper guides. Even the document has been placed at a slight angle in the feeder or on the glass platen, the image can be first scanned, cropped and then straightened automatically.

Automatically Detecting Text Side – No more worry of placing document facing up or facing down

With an advanced processor developed by Copymat, the front side and rear side of document can be scanned simultaneously and the text side will be automatically detected and copied.

Preview Your Copy Result – Lets you verify your result and choose which side you want to copy

Before making more copies, the product allows you to view a reduced size of the scanned document to choose which side you wish to copy.

Innovative and exceptional MFP Function
